QSK 19 Engine Installation Instructions

- 1) Locate the ECM harness on the intake side of the engine.

2) Use a 4mm allen wrench to disconnect the stock **ECM Engine Connector 2**

3) Plug the female connector from the Ag Diesel Solutions harness to the male connector of the stock harness. The 4mm bolt will need to be tightened to secure the connectors. Then, connect the Ag Diesel Solutions male connector into the stock female connector located on the **ECM Engine Connector 2**.

****Caution: Do not over-tighten the 4mm bolt****

4) Route the **Power** to the positive post on the alternator. Ground can also go to the ground post on the alternator if applicable. If not the bolt on the A/C compressor should be sufficient.

5) Plug the harness into the module. Mount the module with supplied zip ties away from any excessive heat or moving parts. **Note: Zip tie the module to the factory wire harness. Mounting the module with the switch connector down will help prevent moisture from collecting into the module connector.**
