**Date:** June 10, 2022

**Models:** 4900 pad mount self-excite

techservice@prestolite.com

**Subject:** Terminal ID from 4900 self to AVI160

Various 4900 series self-excite brush alternators can be replaced by AVI160 series brush alternators. See matrix below.

This document will help identify terminal location variances.

Note: Wire termination and routing will require changes.

4900 series alternators listed on this document are grounded earth return where the AVI160 series replacements are insulated return. Depending on the vehicle wiring a ground strap maybe required.

AVI160 series alternators has a pad mount bracket that uses a short span (108mm) where the 4900 series uses a span of (126mm). Most engine brackets have the ability to accommodate both spans. Please verify your engine bracket and refer to TSB-1049 for more information.

Model #	Voltage	Amperage	Substitute	Model #	Amperage
A0014920PAH	12	220		AVI160P2003 A160203	240
